FATIGUE & FRACTURE of ENGINEERING MATERIALS & STRUCTURES

The International Journal
& the official journal of the European Structural Integrity Society

Editor-in-Chief: K. J. Miller

Volume Contents and Author Index for Volume 15, 1992

Pergamon Press
Oxford · New York · Seoul · Tokyo

FATIGUE & FRACTURE OF ENGINEERING MATERIALS & STRUCTURES

The International Journal

EDITOR-IN-CHIEF

K. J. MILLER, Department of Mechanical and Process Engineering, University of Sheffield, Mappin Street, Sheffield S1 3JD, England

ADVISORY BOARD OF EDITORS

B. A. Bilby
M. W. Brown *(Secretary)*
D. S. Dugdale
G. W. Greenwood
C. Laird
K. J. Miller *(Chairman)*
A. Pineau
B. Tomkins

EDITORIAL BOARD

A. Bakker, Delft University, The Netherlands
A. F. Blom, FAA, Bromma, Sweden
C. M. Cheng, Chinese Academy of Sciences, Beijing, China
N. E. Dowling, Virginia Polytechnic Institute, Va, U.S.A.
M. Elices, Universidad Politecnica de Madrid, Spain
E. G. Ellison, University of Bristol, England
J. M. Finney, Aeronautical Research Laboratories, Melbourne, Australia
N. A. Fleck, University of Cambridge, England
D. Francois, Ecole Centrale des Arts et Manufactures, Paris, France
M. Jono, Osaka University, Japan
J. King, University of Birmingham, England
J. F. Knott, University of Cambridge, England
L. H. Larsson, Noyaret, Boffres, France
Hao Lee, Huazhong University of Science and Technology, Wuhan, China
T. C. Lindley, National Power Technology and Environmental Centre, Leatherhead, England
S. Maddox, The Welding Institute, Cambridge, England
I. Milne, National Power Technology and Environmental Centre, Leatherhead, England
D. Munz, Kernforschungszentrum, Karlsruhe, Germany
H. Nowack, University of GH Duisburg, Germany
V. V. Panasyuk, Institute for Physics and Mechanics, Lvov, Ukraine
R. N. Parkins, Newcastle University, England
R. M. Pelloux, Massachusetts Institute of Technology, Cambridge, Mass., U.S.A.
J. Petit, University of Poitiers, France
W. J. Plumbridge, The Open University, Milton Keynes, England
R. O. Ritchie, University of California, Berkeley, Calif., U.S.A.
J. Schijve, Delft University of Technology, The Netherlands
K. H. Schwalbe, GKSS-Forschungszentrum, Geesthacht, Germany
R. A. Smith, University of Sheffield, England
D. Socie, University of Illinois, Ill., U.S.A.
J. Solin, VTT, Espoo, Finland
R. Sunder, National Aeronautical Laboratory, Bangalore, India
S. Suresh, Brown University, Providence, R.I., U.S.A.
K. Tanaka, Nagoya University, Japan
V. T. Troshchenko, Institute for Problems of Strength, Kiev, Ukraine
J. Wareing, United Kingdom Atomic Energy Authority, Preston, England
K. Yamada, Keio University, Yokohama, Japan
W. Yang, Tsinghua University, Beijing, China

[*Tel.* Exeter (0392) 51558; *Fax* (0392) 425370].

Subscription and Advertising Offices

North America: Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.
Rest of the World: Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, England [*Tel.* Oxford (0865) 794141].

Subscription Rates

Full subscription details are available from Professor K. J. Miller, Editor-in-Chief. Annual institutional subscription rate (1992): £460.00 (US$835.00). Sterling price is definitive. US$ price is quoted for convenience only, and is subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice.

Back Issues

Back issues of all previously published volumes, in both hard copy and in microform, are available on request.

Second class postage paid at RAHWAY, NJ. Postmaster send address corrections to Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

CONTENTS

Number 1

Shinji Kumai, Julia E. King and John F. Knott	1	Fatigue crack growth behaviour in molten-metal processed SiC particle-reinforced aluminium alloys
B. Roebuck	13	Parabolic curved crack fronts in fracture toughness specimens of particulate reinforced aluminium alloy metal matrix composites
Zhiqiang Xing, Yujiu Song and Mingjing Tu	23	Corrosion fatigue fracture-mode maps of low alloy steels
Mukesh Jain	33	Micromechanical stresses during low cycle fatigue of an overaged Al–Mg–Si alloy
Bjørn Skallerud	43	On the relationship between low cycle fatigue and crack growth rate properties in welded steel components
Igor Rychlik	57	Rainflow cycles in Gaussian loads
Fred Nilsson, Jonas Faleskog, Krzysztof Zaremba and Hans Öberg	73	Elastic–plastic fracture mechanics for pressure vessel design
G. H. Farrahi and G. Maeder	91	An experimental study of fretting by means of X-ray diffraction
Ryoichi Koterazawa and Takayoshi Nosho	103	Acceleration of crack growth under intermittent overstressing in different environments

Number 2

Wei Sun and Huseyin Sehitoglu	115	Residual stress fields during fatigue crack growth
E. Erauzkin and A. M. Irisarri	129	Influence of microstructure on the fracture toughness and fracture topography of a duplex stainless steel
K. Ando, B. A. Kim, M. Iwasa and N. Ogura	139	Process zone size failure criterion and probabilistic fracture assessment curves for ceramics

J. M. Finney and G. Deirmendjian 151 Delta-K-effective: which formula?

J. C. W. van Vroonhoven 159 Stress singularities in bi-material wedges with adhesion and delamination

Nils Hallbäck and Fred Nilsson 173 Fracture assessment for secondary loads

G. C. Li, H. Q. Liu, M. L. Du, Y. S. Hong and X. Zhang 187 Crack tip behaviour and crack propagation in ductile materials

A. N. Vasjutin 203 Fracture mechanics of physically short cracks

Yasuo Nagase and Toshifumi Kanri 213 Effects of small prestrain on the fatigue behaviour of spheroidal pearlite steel

Technical Note
Nie Hong, Qiao Xin and Fan Weixiun 225 A criterion for fatigue damage under combined bending and torsion based on the local stress–strain method

I Information on Conferences/Seminars

Number 3

A Letter from the Editor iii

J. Joch and R. A. Ainsworth 229 The effect of geometry on the development of creep singular fields for defects under step-load controlled loading

Ling Chao and Zheng Xiulin 241 Effects of cold expansion of a hole on fatigue crack initiation location and life of an LY12CZ alloy

M. de Sanctis and L. Lazzeri 249 An evaluation of fatigue and fracture mechanics properties of ultra-high strength 7XXX series Al-alloys

H. R. Mayer, S. E. Stanzl, E. K. Tschegg and J. Schijve 265 Fatigue crack growth of Al 2024-T3 under low amplitude two-step loading

L. Hodulak, J. G. Blauel, Ch. Berger and J. Saß 277 Safety assessment of a cast steel valve casing using NDE and fracture mechanics

R. M. J. Kemp, R. N. Wilson and P. J. Gregson 291 The effects of frequency and R-ratio on fatigue crack growth behaviour in Al–Li–Cu–Mg alloy (8090) plate

J. C. Healy, L. Grabowski and C. J. Beevers — 309 Monitoring fatigue of a nickel-base superalloy at positive and negative stress ratios using an optical system

I Information on Conferences/Seminars

Number 4

I. S. Putra and J. Schijve — 323 Crack opening stress measurements of surface cracks in 7075-T6 aluminium alloy plate specimen through electron fractography

W. Zhao — 339 Analyses of four symmetric corner cracks in elastic plates

C. Mattheck, D. Erb, K. Bethge and U. Begemann — 347 Three-dimensional shape optimization of a bar with a rectangular hole

M. Goto and H. Nisitani — 353 Crack initiation and propagation behaviour of a heat-treated carbon steel in corrosion fatigue

Andrea Carpinteri — 365 Crack propagation under cyclic loading

J. Alcalá and M. Ledezma — 377 An evaluation of the fracture resistance of engineering materials from the fracture surface morphology

T. J. Sweeting — 391 A method for the construction of safe S–N curves

R. W. Suhr — 399 Interaction of high-strain and high-cycle fatigue in turbine materials

Technical Note
E. Aghion — 417 Surface degradation of a nickel base superalloy under SO_2 environment

I Information on Conferences/Seminars

Number 5

M. R. Ling and J. Schijve — 421 The effect of intermediate heat treatments on overload induced retardations during fatigue crack growth in an Al-alloy

Yang Guang Li and Ji Song Qiao — 431 — Effects of brush electroplating and shot peening on the fatigue strength of a medium strength steel

D. P. Rooke, D. B. Rayaprolu and M. H. Aliabadi — 441 — Crack-line and edge Green's functions for stress intensity factors of inclined edge cracks

F. Casciati, P. Colombi and L. Faravelli — 463 — Fatigue crack size probability distribution via a filter technique

Jong-Han Kim and Ji-Ho Song — 477 — Crack growth and closure behaviour of surface cracks under axial loading

M. A. Pompetzki, T. H. Topper and B. J. Dabell — 491 — Determination of the possible error in fatigue damage for a discrete strain history

Ryoichi Koterazawa and Takayoshi Nosho — 507 — Acceleration of crack growth under intermittent overloading at elevated temperature

I — Information on Conferences/Seminars

Number 6

Song-Hee Kim and Weon-Pil Tai — 519 — Retardation and arrest of fatigue crack growth in AISI 4340 steel by introducing rest periods and overloads

Sheri D. Sheppard and Michael Strange — 531 — Fatigue life estimation in resistance spot welds: initiation and early growth phase

A. P. Reynolds — 551 — Constant amplitude and post-overload fatigue crack growth behavior in PM aluminum alloy AA 8009

Hu Zhizhong, Ma Lihua and Cao Shuzhen — 563 — A study of shear fatigue crack mechanisms

Wei-di Cao and Hans Conrad — 573 — On the effect of persistent slip band (PSB) parameters on fatigue life

E. G. Ellison and M. Kobayashi — 585 — Some observations on creep crack initiation from notches

L. Grabowski and J. E. King — 595 — Modelling short crack growth behaviour in nickel-base superalloys

K. L. Barui and B. Bhattacharya — 607 Fracture mechanics approach for prediction of fatigue life of high strength steel components

Technical Note
V. M. Radhakrishnan — 617 Creep fracture of Cr–Mo steel

I Information on Conferences/Seminars

Number 7

Seung-Ho Ahn, Frederick V. Lawrence Jr and Marvin M. Metzger* — 625 Corrosion fatigue of an HSLA steel

T. Tanaka, N. Okabe, H. Nakayama and Y. Ishimaru — 643 Fatigue crack growth of silicon nitride with crack wedging by fine fragments

J. LLorca — 655 Roughness-induced fatigue crack closure: a numerical study

C. M. Suh, J. J. Lee, Y. G. Kang, H. J. Ahn and B. C. Woo — 671 A simulation of the fatigue crack process in type 304 stainless steel at 538°C

J. Joch and R. A. Ainsworth — 685 The development of creep singular fields for defects in thermally loaded structures

G. S. Wang, B. Palmberg and A. F. Blom — 695 Stress state-related fatigue crack growth under spectrum loading

Technical Note
M. V. Baumshtein and V. A. Vainshtok — 713 Crack growth analysis for variable loading conditions

I Information on Conferences/Seminars

Number 8

David L. McDowell and Jean-Yves Berard — 719 A ΔJ-based approach to biaxial fatigue

A. P. Kfouri, H. D. Wong and K. J. Miller — 743 Elastic–plastic finite element analyses of cracked notches in plates under mixed-mode loading

M. Kage, K. J. Miller and R. A. Smith — 763 — Fatigue crack initiation and propagation in a low-carbon steel of two different grain sizes

D. N. Lal — 775 — A model for the combined effects of stress ratio and grain size on the LEFM fatigue threshold condition

D. N. Lal — 793 — A model for the effect of a gaseous environment on the LEFM fatigue threshold condition of steels

Ki Woo Nam, Kotoji Ando, Sakai Yuzuru and Nobukazu Ogura — 809 — Leak-before-break conditions of plates and pipes under high fatigue stresses

I — Information on Conferences/Seminars

Number 9

V. N. Shlyannikov and N. Z. Braude — 825 — A model for predicting crack growth rate for mixed mode fracture under biaxial loads

P. Hyspecký and B. Strnadel — 845 — Conversion of short fatigue cracks into a long crack

H.-J. Christ, C. Sommer, H. Mughrabi, A. P. Voskamp, J. M. Beswick and F. Hengerer — 855 — Fatigue behaviour of three variants of the roller bearing steel SAE 52100

Sergio Lai — 871 — Behaviour of fibre-reinforced concretes with reference to fracture resistance

A. I. Gustavsson and A. Melander — 881 — Fatigue limit model for hardened steels

H. Abdel-Raouf, T. H. Topper and A. Plumtree — 895 — A model for the fatigue limit and short crack behaviour related to surface strain redistribution

Z. Cen and G. Maier — 911 — Bifurcations and instabilities in fracture of cohesive-softening structures: a boundary element analysis

I — Information on Conferences/Seminars

Number 10

iii Announcement

Kiril Minchev — 929 Some mechanical characteristics of nitrogen structural steels

M. Dohnal, J. Vystrcil, M. Kvapilik, J. Vykutil and J. Dohnalova — 939 A brittle fracture knowledge base and its practical applications

M. Goto — 953 Scatter characteristics of fatigue life and the behaviour of small cracks

P. E. Bold, M. W. Brown and R. J. Allen — 965 A review of fatigue crack growth in steels under mixed mode I and II loading

D. L. DuQuesnay, H. Abdel-Raouf, T. H. Topper and A. Plumtree — 979 A modified fracture mechanics approach to metal fatigue

V. M. Karbhari — 995 Effects of constituent scale on stress transfer and matrix cracking

M. L. Du, G. C. Li, Y. Z. Zhang and W. D. Fang — 1009 Fracture behaviour of axisymmetric bars under high triaxial stress and large strain cyclic loading

T. Winkler, A. Brückner-Foit and H. Riesch-Oppermann — 1025 Statistical characterization of random crack patterns caused by thermal fatigue

Z. L. Zhang and T. P. J. Mikkola — 1041 A simple path-independent integral for calculating mixed-mode stress intensity factors

I Information on Conferences/Seminars

Number 11

A. Bakker — 1051 Three-dimensional constraint effects on stress intensity distributions in plate geometries with through-thickness cracks

J. D. G. Sumpter — 1071 Simple J_c estimation formulae for three-point bend specimens

T. S. P. Austin and G. A. Webster — 1081 Prediction of creep crack growth incubation periods

J. E. Perez Ipiña — 1091 — CTOD for slow stable crack growth conditions

G. Gabetta and L. Torri — 1101 — Crack nucleation and propagation in blade steel material

Xi Cong Liu and Claude Bathias — 1113 — Fatigue behaviour of Al_2O_3 short fibre reinforced aluminium alloy

A. H. Rosenberger and H. Ghonem — 1125 — Effect of cycle mean strain on small crack growth in Alloy 718 at elevated temperatures

Andrea Carpinteri — 1141 — Elliptical-arc surface cracks in round bars

G. Hénaff, J. Petit and B. Journet — 1155 — Fatigue crack propagation behaviour under variable amplitude loading in the near-threshold region of a high-strength low-alloy steel

I — Information on Conferences/Seminars

Number 12

K. Ando, K. Mogami and K. Tuji — 1171 — Probabilistic aspects of cleavage crack initiation sites and fracture toughness

Hong Youshi, M. W. Brown and K. J. Miller — 1185 — Fatigue crack growth from a circular notch under high levels of biaxial stress

D. N. Lal — 1199 — The combined effects of stress ratio and yield strength on the LEFM fatigue threshold condition

Lü Baotong and Zheng Xiulin — 1213 — Predicting fatigue crack initiation life of an aluminium alloy at low temperatures

C. H. Wang and K. J. Miller — 1223 — The effects of mean and alternating shear stresses on short fatigue crack growth rates

S. Kocanda and D. Natkaniec — 1237 — Fatigue crack initiation and propagation in laser-hardened, medium-carbon steel

P. A. S. Reed and J. F. Knott — 1251 — An investigation of the warm prestressing (WPS) effect in A533B weld metal

J. K. Li, Yao Mei, Wang Duo and Wang Renzhi — 1271 An analysis of stress concentrations caused by shot peening and its application in predicting fatigue strength

Technical Note
E. E. Zasimchuk, A. I. Radchenco and M. V. Karuskevich — 1281 Single-crystals as an indicator of fatigue damage
